BOATING ACCESSORIES

Rods boat holder

Welcome to the world of innovation and functionality with the MARINAC spinning rods boat holder! This product is a real assistant for effective fishing and recreation on the water, which combines advanced technology and stylish design.

Holders for spinning with EPDM inserts: safe and reliable holding of rods, avoiding damage. Special universal grooves reliably hold spinning both with inertialess and multiplier reels.

Convenient storage of baits: special holes for baits ensure a quick change of the arsenal without the risk of falling out.

Compartments for tools: safe and convenient storage of instruments with elastic inserts made of EPDM material.

Corrosion resistance: aluminum alloy provides durability and reliable protection against corrosion.

Stylish design: MARINAC's original design emphasizes functionality and complements your boat with a stylish accent.

Easy installation: easy mounting to the T-slot profile or direct, fast and reliable installation on the side of the boat.

Enhance your fishing experience with spinning rods boat holder from MARINAC - choose convenience and quality together!

Characteristics:

Materials:

- Body – aluminum alloy.
- Inserts - EPDM elastic material.

Dimensions: 220*212*75 mm

- Weight - 500 g

Boat organizer XL

The XL boat organizer from MARINAC is the perfect organizer for your boat, designed to provide the highest level of convenience. This universal product is installed using a mounting plate and performs a number of useful functions.

Holders for spinning: special inserts made of elastic EPDM material on the edges fix and protect spinning from damage. Thanks to the special grooves for the coils, they are fixed in one position, suitable for use with both inertialess and multiplier coils.

Holders for tools and knives: elliptical holes inside create a convenient place to store tools and knives, ensuring their safety and reliability of fixation.

Dry box: the central box made of durable ABS plastic protects important items from moisture, allowing you to keep your phone, keys and other valuables close at hand and dry.

Bait storage holes: specially designed holes make it easy to hold working baits without letting them fall out, even when the boat is at full speed in high waves.

Front panel made of EVA material: processing the front panel with EVA material prevents the baits from banging against the body and adds an original design to the product.

Additional loops and holes: the organizer is equipped with additional loops that open many possibilities for attaching additional elements.

Enjoy fishing with the reliable boat organizer XL from MARINAC!

Characteristics:

- Frame: aluminum
- Upper and lower bars: ABS plastic 4 mm
- Inserts: EPDM material
- Front panel: EVA material
- Dry box: impact-resistant ABS plastic
- Dimensions: 454*160*153 mm
- Weight: 1380 g

Boat organizer XL

Boat organizer L

Organizer "L" from "MARINAC" is an ideal solution for organizing space on your boat. This versatile product is installed with a mounting plate and has a number of impressive features that will make your fishing easier and provide comfort when traveling on the water.

Spinning holders: inserts on the edges, made of elastic EPDM material, securely hold spinning and protect them from damage. Special grooves for the reels fix the spinning in one position, suitable for use with inertialess and multi-picker reels.

Tool and Knife Holders: Elliptical holes inside allow for convenient storage of tools and knives, providing easy access and secure hold.

Stainless Steel Cup Holder: Ideal for holding a water bottle, can or beverage cup, providing a stable and secure fit.

Holes for storing baits: baits are always at hand, and specially designed holes do not allow them to fall out even when the boat is actively moving.

Front panel made of EVA material: prevents baits from banging against the body and creates an original design.

Original design: the product impresses with its aesthetics and sophisticated style, adding a unique accent to your boat.

With the organizer from "MARINAC" your fishing will become more organized and comfortable!

Characteristics:

- Frame: aluminum
- Upper and lower bars: ABS plastic 4 mm
- Inserts: EPDM material
- Front panel: EVA material
- Cup holder: stainless steel
- Dimensions: 342*145*160 mm
- Weight: 1200 g

Boat organizer L

High-quality materials: the body is made of aluminum, EPDM inserts ensure reliability and durability, and the stainless steel cup holder guarantees resistance to water and wear.

Universal fixing: thanks to special bolts, the organizer is easily attached to the T-slot profile or to the side of the boat, performing a variety of useful functions.

Ruler for quick measurements: the built-in ruler allows you to quickly and accurately measure the size of the fish or the length of the leash.

Integrated tool holes: special tool holes with EPDM inserts provide easy and safe storage of fishing tools, preventing them from rattling.

Cup holder for convenience: the built-in cup holder allows you to enjoy your favorite drink directly on the boat - whether it's water, coffee or even beer.

Optimal size and weight: compact size and weight ensure convenient and comfortable use without excessive burden.

Original design: the asymmetric design of the organizer line will complement the style of your boat, making it not only practical, but also aesthetically appealing.

Optimize your time on the water and enjoy every moment with MARINAC!

Boat Seat Cover

The MARINAC boat seat cover provides reliable protection for your seat from rain, snow, sun, and other weather conditions. Made from durable, waterproof material with sealed seams, it ensures that the cover retains its properties even after prolonged contact with water.

Ease of use: the cover is easy to put on and take off, requiring no special skills. It folds into a small pouch, making it convenient for transportation and storage. On the inside of the cover, there is a pocket for storing the pouch, ensuring you don't lose it.

Versatility: the cover has a universal size that fits all types of boat seats. It easily adapts to any size and shape of the seat and is secured with an elastic drawstring, providing reliable protection.

High quality: the cover is made from modern materials and meets high-quality standards. It will serve you for many years, reliably protecting your seat from the elements.

Material characteristics: the seat cover is made from Nylon, a durable, waterproof fabric with additional reinforcement.

The MARINAC boat seat cover is an essential accessory for any fisherman. It will protect your seat from bad weather, extend its lifespan, and help keep it clean.

Characteristics:

- Waterproofness: 4000 mm water column
- Tear Resistance: 250 N
- UV Resistance: UPF 50+
- Weight: 250 g

Flexi EVA boat fender

The innovative boat fender made of EVA material is an ideal solution for your boat to ensure high reliability and comfort in use.

With this flat EVA fender, your boat will be maximally protected and ready for any adventure on the water!

Three-layer construction: this boat fender has an inner layer of elastic material for load cushioning and two outer layers of high-density material for shock absorption.

Flexibility and durability: EVA material provides not only flexibility in use, but also high resistance to weather conditions, sun, frost and salt water.

Mobile fasteners: four segments of the boat fender are connected by a rope, which allows you to distribute them conveniently on the boat according to the needs of the user.

Versatility of attachment: the fender may be attached not only to the side of the boat, but also to the mooring posts or to the platform of the pier, which expands its functionality.

Additional features: the excellent thermal insulation of the material allows the boat fender to be used as a seat pad on the deck or any other surface, even in cold weather.

Protection: the fender fits perfectly to the board due to the fact that it is flat; it does not wobble when pressed and has a larger area of protection.

Characteristics:

- Material: EVA
- Dimensions: 430*295*47

Motor Support PRO series

The shock absorber of the PRO series for boat engines is an ideal solution for reliable and safe fixation of the outboard motor during transportation. It's simple and practical design provides effective fixation and cushioning thanks to specially designed components.

Locking and damping: prevents excessive vertical movement of the motor, distributing the load and ensuring stability during transport.

Reliable materials: the base of the stop is made of high-strength polyurethane, combines strength and elasticity, and also perfectly resists the aggressive effects of ultraviolet light and oil products. The aluminum tube is resistant to corrosion and adds rigidity to the stop under loads.

Versatility and compatibility: fits most outboard motors with hydraulic lifting systems and two open rods. This makes it a universal solution for owners of various models of boat motors.

Damping support for marine engines from MARINAC is a reliable and universal solution for stable fixation and protection of your marine engine during transportation.

YAMAHA: 115 to 350 hp models, except F115B and F130A models. V8 model requires 2 stops.

MERCURY: All models including PRO XS with three-bar lift and tilt adjustment.

SUZUKI: four-stroke outboard motors from DF140 to DF350 hp.

EVINRUDE: 150 to 300 hp. except for the second generation

JONSON: from 150 to 300 hp. except for the second generation

TOHATSU: all models from 150 to 250 hp.

Characteristics:

Materials:

- Base: polyurethane
- Tube: aluminum

Dimensions: 220*47*47 mm

- Weight: 420 g

Trolling Motor Mounting Multi Plate

The mounting plate embodies simplicity and reliability, providing convenience and multi-functionality. This high-quality product is easily installed on the bow of the boat and serves as an ideal mount for a variety of useful devices.

The plate is made of 10 mm thick corrosion-resistant aluminum alloy with excellent powder coating and original shape. Let the mounting plate be a reliable and stylish solution to your water needs.

Trolling electric motor: the main advantage of the plate is not only the quick installation of the electric anchor, but also the possibility of accurate alignment of the anchor along the axis of the keel. This eliminates unnecessary swings and inaccuracies when anchoring in currents or strong winds. Your boat will always keep a clear course when the electric motor is running.

Lights and searchlights: the plate helps to easily mount various lighting devices, which ensures safe movement on the water in conditions of low visibility.

Camcorder or night vision camera: capture boat movements or navigate at night without lighting. "Point" GPS compass: for maximum accuracy, an anchor compass can be mounted next to the plate.

Electric winch: if an electric motor is not available, an electric winch can easily be installed on the plate to raise and lower the anchor without the risk of snagging the boat.

Other useful devices: the plate is ready to attach any other devices.

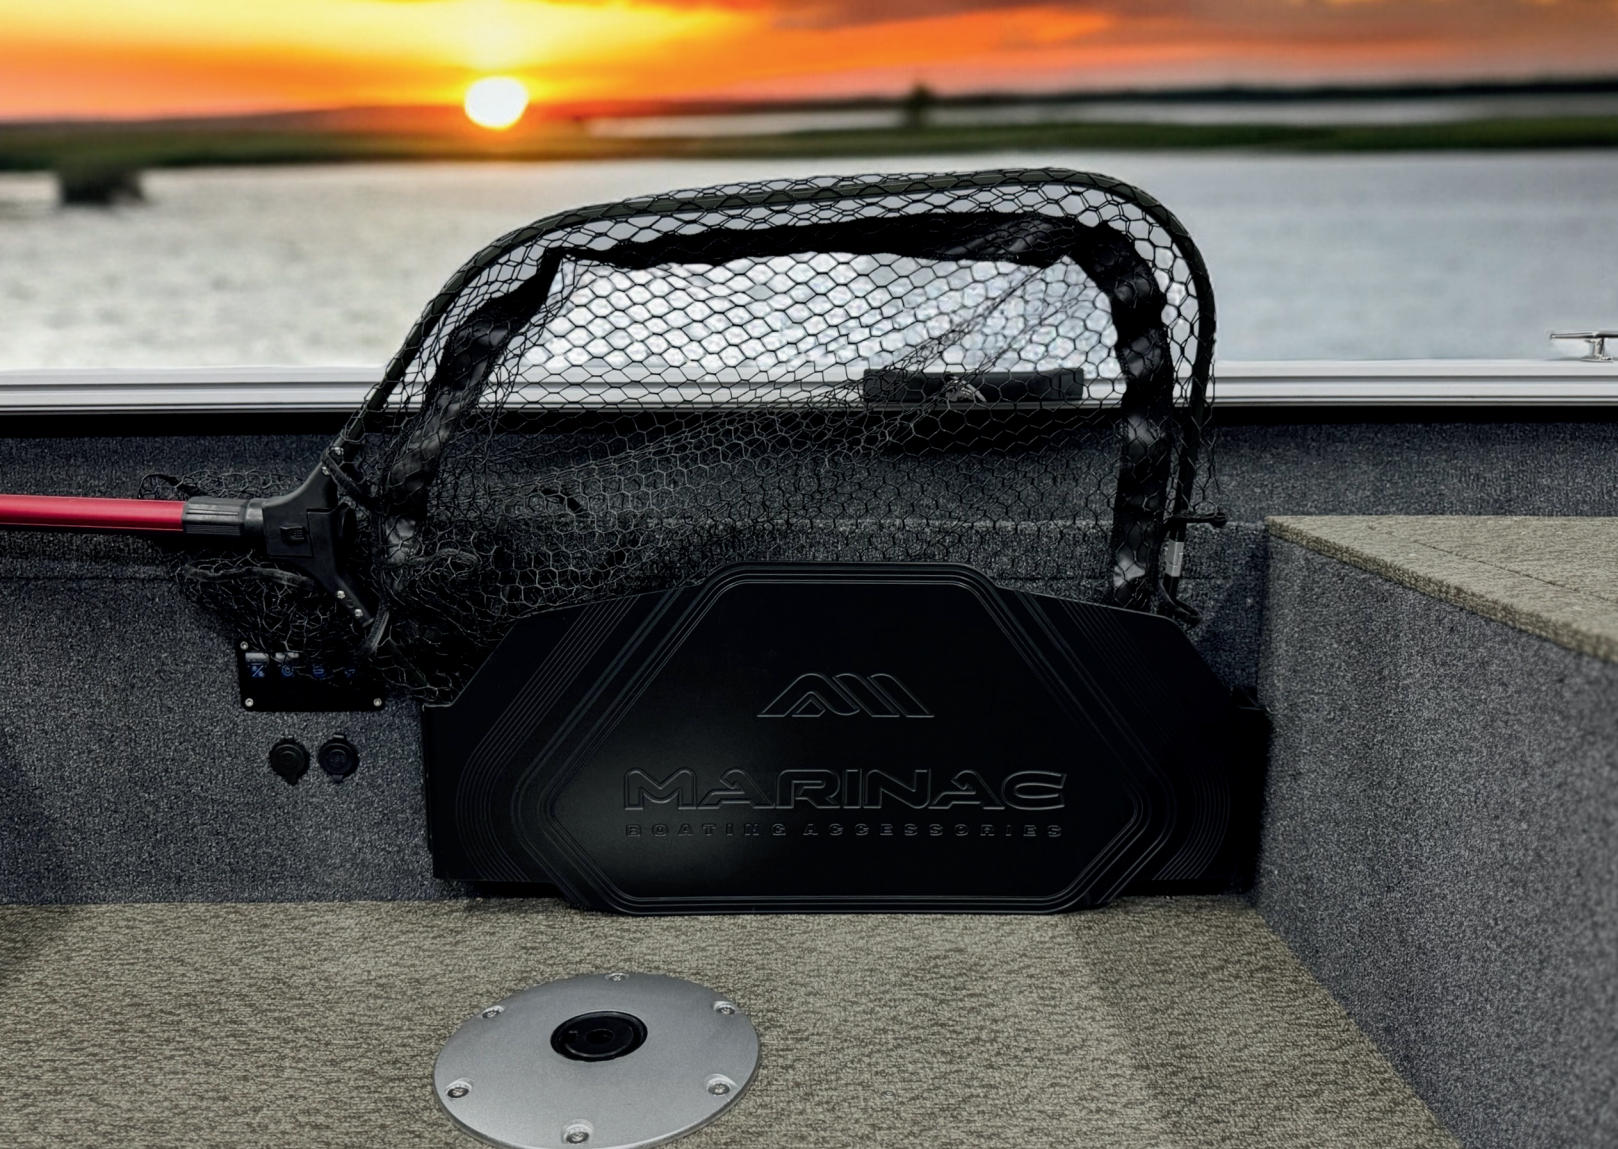

Characteristics:

- Materials: aluminum
- Dimensions: 538*312*10 mm
- Weight - 4 kg

Folding net boat holder

We present to you the innovative "MARINAC" folding net boat holder - your faithful companion in the world of fishing. This unique product is designed for optimal storage and easy access to your landing net during your adventures on the water.

Reliable fastening: the "MARINAC" folding net boat holder mounts vertically to the side of the boat, ensuring a secure hold of your landing net, even when moving at full speed. Forget about worrying about losing the landing net - it always stays in place.

Easy access and convenience: thanks to the vertical position of the holder, your landing net is always at hand. It will not disturb you while fishing because it does not need to be constantly moved around the boat.

Strong and reliable material: made of high-quality 6mm ABS plastic, the MARINAC folding net boat holder has impressive strength and durability and is highly weather-resistant.

Additional fastening to the deck: to avoid unnecessary vibration, we added an additional mount to the deck, which makes the product even more stable and functional.

Original design: our holder has a stylish and original design that will perfectly complement the appearance of your boat.

Make your fishing more comfortable and organized with the MARINAC folding net boat holder.

Characteristics:

- Material: shock-resistant ABS plastic
- Length of the internal working area: 798 mm
- Width of the internal working area: 50 mm
- Overall dimensions: 874*329*65 mm
- Weight: 1380 g

T-slot holder

Made from lightweight and strong aluminum alloy, the T-slot is corrosion resistant and ideal for mounting almost any accessory, from simple cup holders to rod holders and organizers. Available in two sizes - 300 and 500 mm, but a special adapter allows you to connect several profiles, lengthening the product according to your needs.

Easy Installation: Forget restrictions – the T-slot can be quickly installed on any vertical surface of the boat, be it deck, inboard or gunwale.

Versatility: Use the T-slot to mount a variety of accessories, from rod holders to extra stands and drink holders.

Durability and Lightness: Constructed of high quality aluminum alloy, the T-slot combines lightness and strength for durability and reliability.

Wide functionality: ideal for creating an ergonomic boat space adapted to your style and needs.

Connection system: a simple adapter provided in each kit allows you to create the required profile length to make full use of the boat's area.

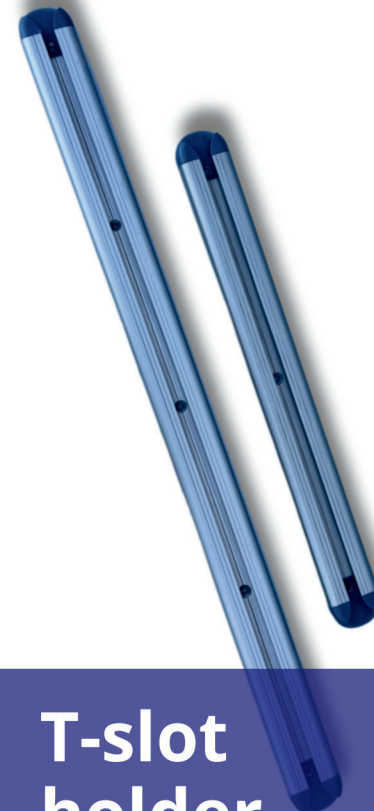

Adjustable and Moveable: Thanks to the quick release mechanism, everything can be easily moved or removed in seconds, allowing you to make adjustments at any time.

Make your boat as comfortable as possible and enjoy your vacation on the water with MARINAC.

Characteristics:

Materials:

- Body: aluminum
 - Plugs and adapter: ABS plastic
- Dimensions: 340 / 540*35*15 mm
- Weight: 235 / 380 g

Boat Seat

Introducing the MARINAC boat seat - a product designed to provide you with unparalleled comfort and support during any water adventure. Our seats combine modern design, ergonomics, and high durability, making them the perfect choice for both professional anglers and enthusiasts.

Modern design: MARINAC seats feature a stylish and elegant appearance that perfectly complements the interior of your boat.

Ergonomic shape: the specially designed shape of the seat contours to your body, providing an orthopedic effect and maximum comfort during long journeys.

Lateral support and lumbar support: with lateral support and a lumbar support cushion, you get additional stability and reduced strain on your back.

Leg support: our seats also offer optimal leg support, which helps reduce fatigue and increase comfort.

Strength and reliability: the seats are made from ultra-strong materials and can withstand loads up to 150 kg. You can be confident in their durability and reliability.

Waterproof and weather-resistant materials: the seats are upholstered with high-quality materials that are not only waterproof but also resistant to any weather conditions. This allows them to be used in any climate and weather.

Compactness when folded: when folded, MARINAC seats allow you to sit comfortably on top, adding extra convenience and functionality.

Recommended by professionals: our seats have been tested for years by professional anglers and have only received positive reviews. They have earned high recommendations from professionals for their numerous advantages over other similar products.

Choose MARINAC boat seats and enjoy maximum comfort, reliability, and style during your water journeys.
